STRING ROTATION
CHALLENGE DESCRIPTION:

You are given two strings. Determine if the second string is a rotation of the first string.

INPUT SAMPLE:

Your program should accept as its first argument a path to a filename. Each line in this file contains two comma separated strings. E.g.

Hello,lloHe
Basefont,tBasefon

OUTPUT SAMPLE:

Print out True/False if the second string is a rotation of the first. E.g.

True
True
